How we design your portfolios and work together with you

Your advisor can design personalized portfolios for you using a wide variety of investment solutions.

After working with you to assess your unique situation, define your goals and develop a strategy to pursue them, your advisor can use our open platform of investment strategies and vehicles to give you access to a range of investment managers and portfolios from Merrill, Bank of America and third-party investment providers. Your advisor will then help you monitor your progress and rebalance your portfolios as needed to keep you on track.

Depending on your unique situation, your advisor will help you choose from among four investment strategies to create the appropriate solution for you while also giving you the option of ongoing flexibility with your investments.

<td><strong>Custom Managed Strategies</strong> are used when you need a more customized approach to portfolio construction. Working closely with your advisor, you’ll decide which investment strategy is right for you and determine who has authority, or discretion, over certain day-to-day investment decisions.

Depending on the overall strategy type you select together, you can maintain discretion or give it to your advisor.

- **Client discretion**
  - When you maintain discretion, your advisor will provide advice and guidance based on the overall strategy you outlined together. Your advisor will not make any adjustments or changes unless you agree to them first.

- **Advisor discretion**
  - When you delegate discretion, you maintain control over the overarching goals and priorities that guide your investments, but allow your advisor to manage the day-to-day investment decisions. This means that as market conditions change, your advisor can react quickly — even if you’re not available.
